Author's review Here it is, the incredible and amazing collection of Superior Drummer 3 Premium. If you are a serious drummer, no need to take time. We saved the best-sounding and most-updated custom-made preset pack for you. Seasoned producers all over the world are using their version of premium presets for Superior Drummer 3 to create awesome drum parts for their songs or whole albums. We have put the best version together. All the presets are 100% compatible with SD3 v3.2 or later. Key features: We have compiled a long set of premium presets which includes General, Produced, Hands, and Snares. If you are looking for more drum kits or if you are not interested in producing drums, there is a separate pack for you. These presets are specifically made for Metal, Rock, or Hip-Hop. There is no pretense when it comes to rock, metal, and hip-hop. They're not for 90's and 80's techno or pop. There is no way you can make them work for those genres. It's not even about how expensive the drums are or the next best ones. If you are interested in electronic music like I am, we also have a separate pack of electronic drum kits. We have broken them down by genre, like drums, plugins, vocals, FXs, etc. When you make a purchase, you get all of them. No one-click, no two-click, no copying and pasting. Everything is made with SD3 in mind. We have spent a lot of time and resources to put together these great presets. And we believe they are worth every penny! No matter what your budget is, there is something for you. We also have a separate pack of seven world-class, custom drum kits. We are offering them for a fraction of what they normally cost. Why should you bother buying, if you can get them for free and with way more power in free presets? We made these presets 100% for SD3 v3.2 or later. It's important to know that because some drum kits got changes due to improvements in that version. Some people send us requests to include a preset but they keep asking for updates to another newer version of Superior Drummer, in which case they will never use our preset pack. They are forcing us to update our preset pack. They would rather update another great drum software than give our f678ea9f9e
